

OverWatch™ Standalone Application

User Guide

OverWatch™ MIL KIT

OverWatch™ Overview

OverWatch™ Provides persistent video surveillance at the tactical edge. Networked to stream video through a tethered connection or broadcast over an encrypted tactical radio network. OverWatch™ will present a live view of the battlespace from a fixed or concealed position.

OverWatch™ reduces the risk of exposure and detection by allowing the user to leave the system behind and access the video stream remotely through Mobile Tactical & Command Post Systems. The system can create tactical video from any connected optic or video source.

OverWatch™ is a low-voltage capability powered through a micro USB connection or tethered to standard military batteries for extended operations. The system provides automatic network routing and multicast support for rapid deployment and ease of use.

Before We Begin...

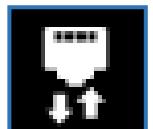

This document assumes the following:

1. The Reader has followed the steps found in the OverWatch™ Setup Guide
2. The Reader has the system set up and the EUD is receiving an IP Address from the OverWatch™ System.

This icon indicates the tablet/EUD detects a network connection

This icon indicates the tablet/EUD is receiving an IP address from the OverWatch™ System

Install Overwatch™ Standalone App

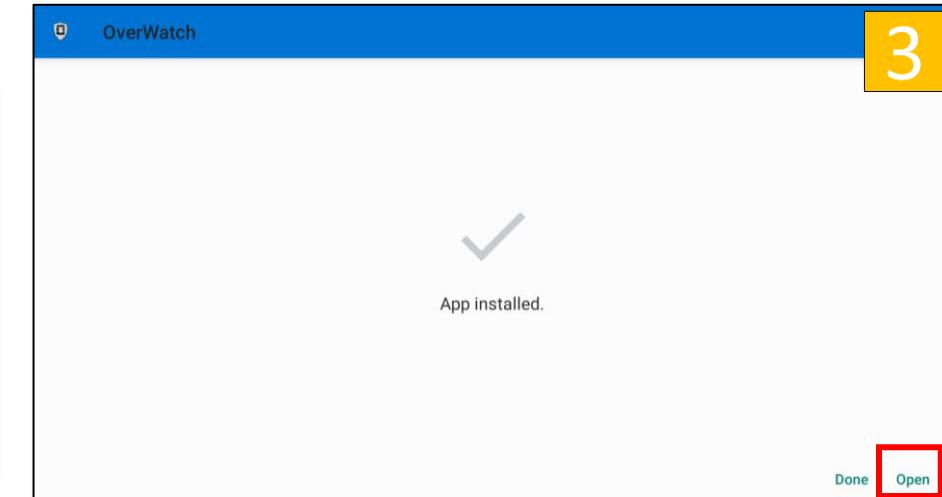

2

3

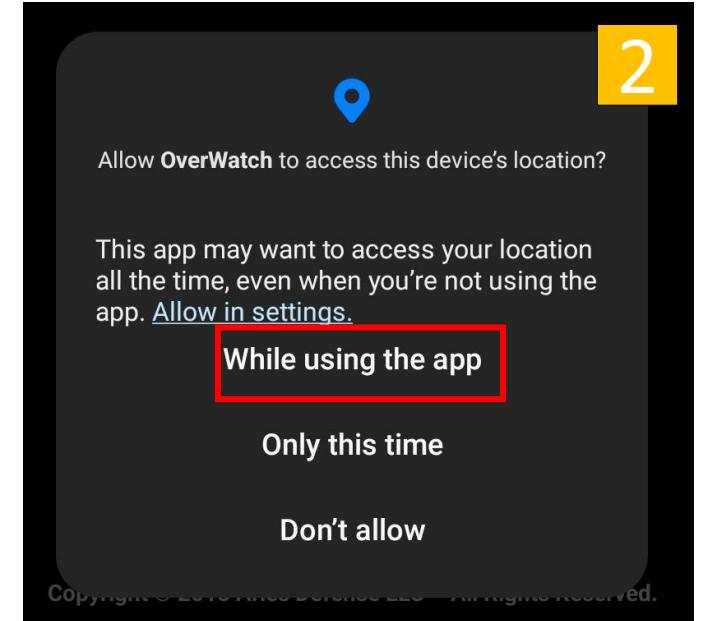

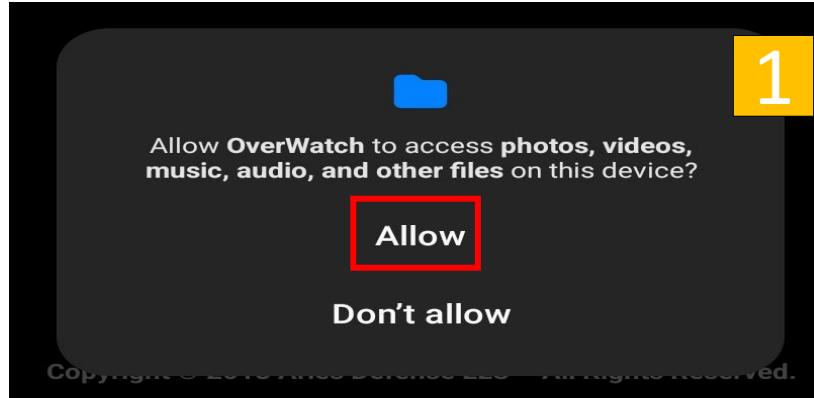

1. Tap the OverWatch Standalone APK file to begin installation.
2. Review the Permissions Statement then tap Install.
3. Tap Open once the installation is complete.

Note: The actual APK name may change. Also you may have to adjust the security settings on your device to install this application.

Allow App Permissions

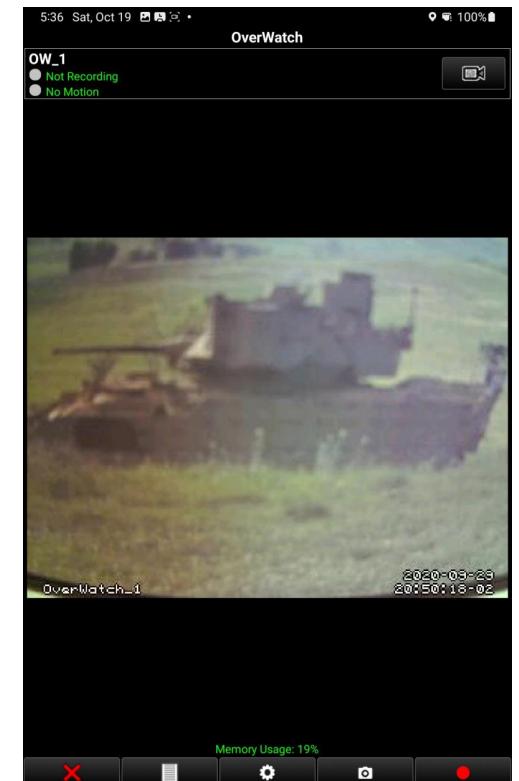

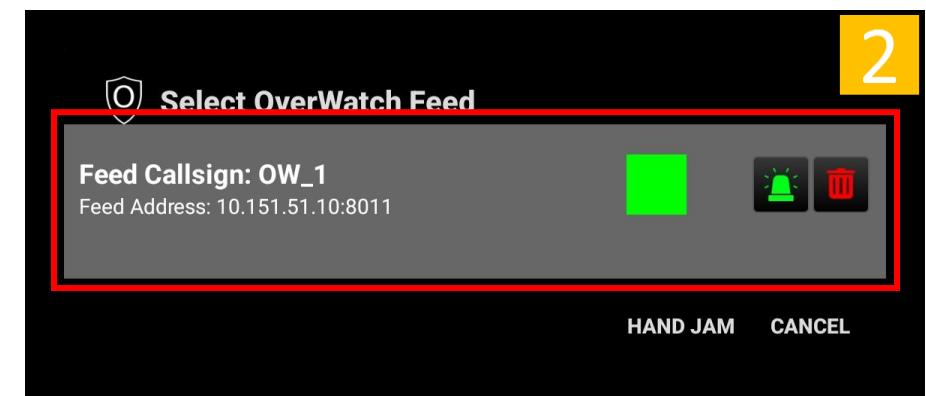

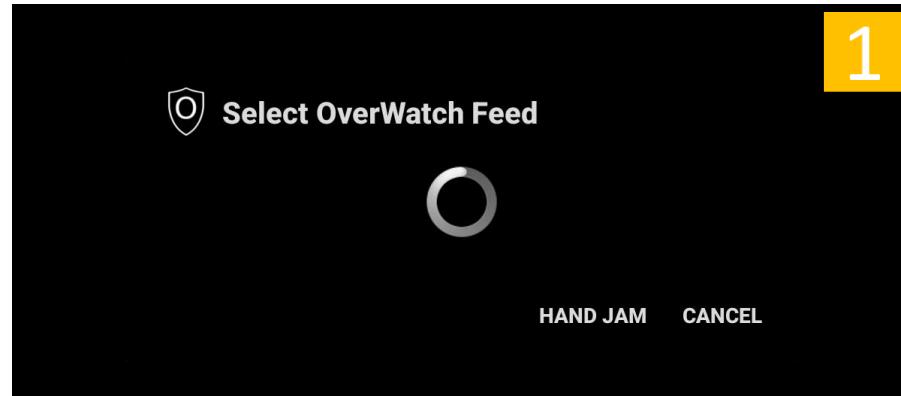

1. **Tap Allow** when prompted to set “Allow OverWatch to access photos, media, and files on your Device?”.
2. **Tap Allow** when prompted to set “Allow OverWatch to access this device’s location?”

Failing to allow these permissions will limit / prevent proper functionality of the OverWatch™ System.

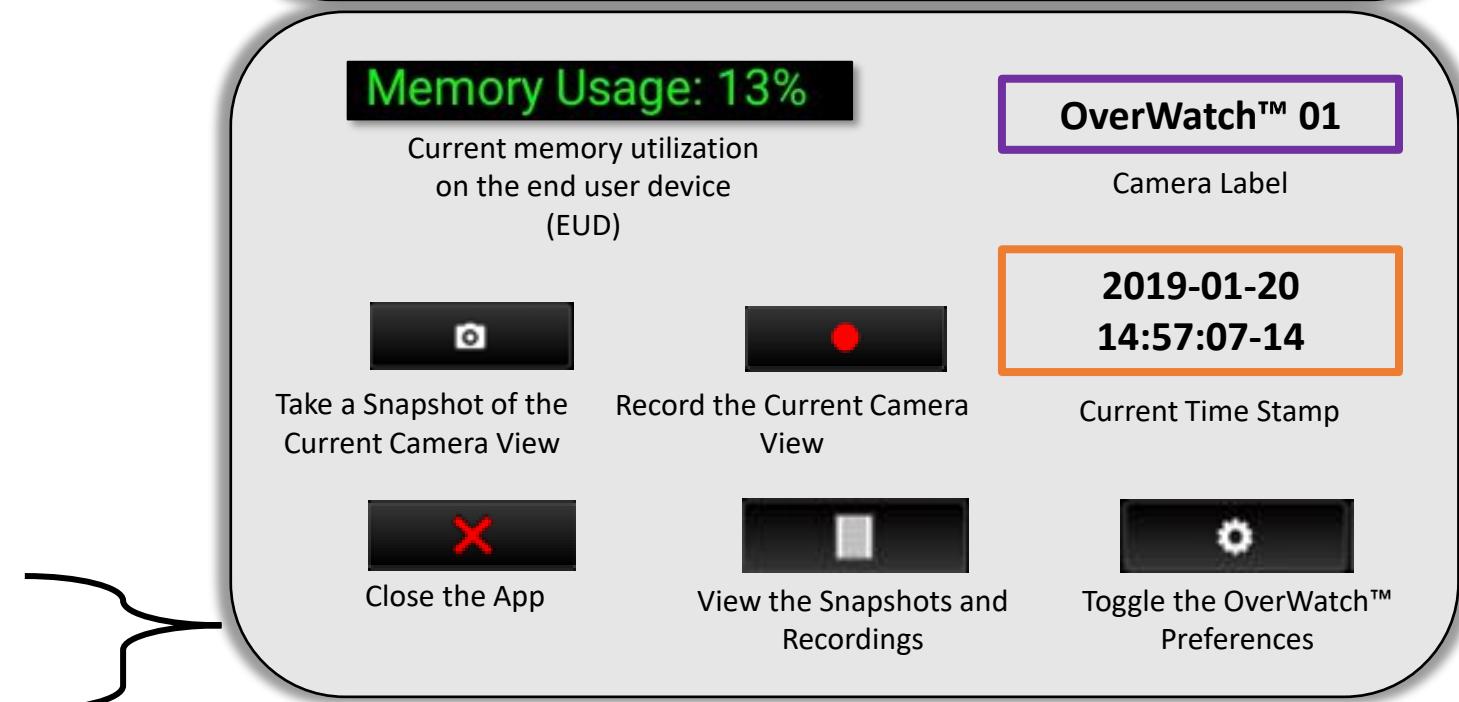

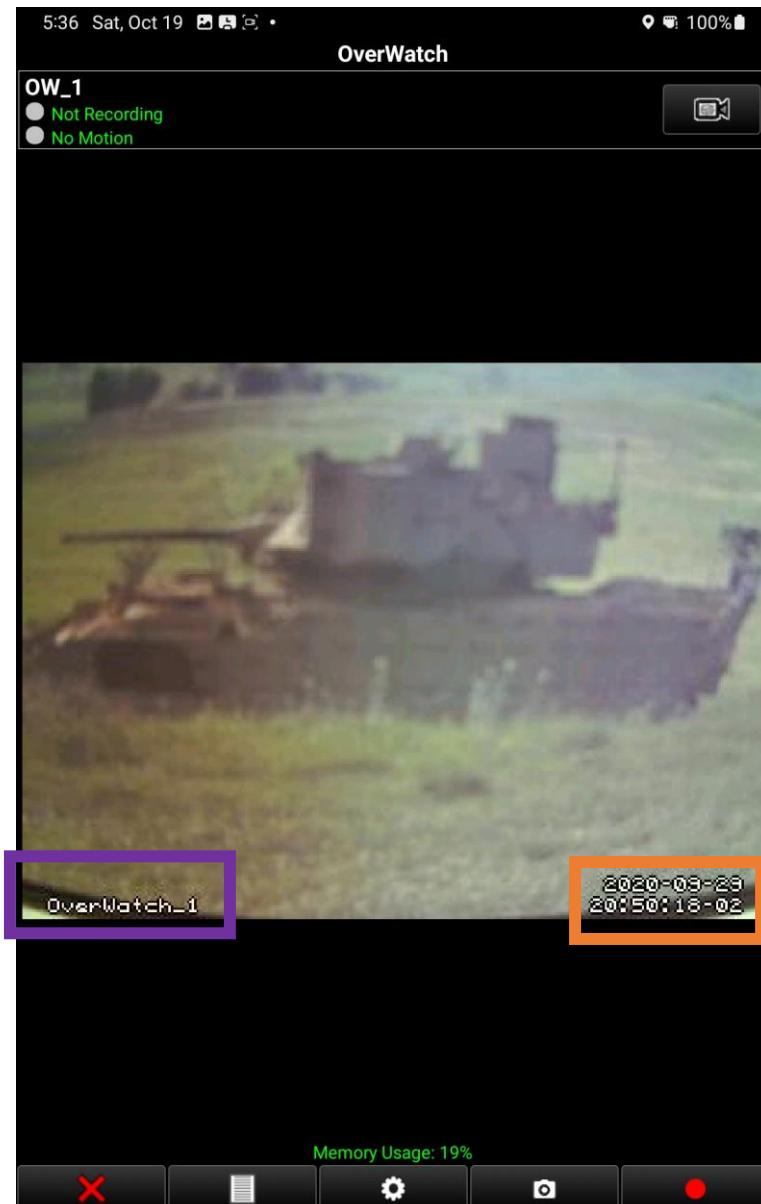

Initial Sensor Setup

1. Upon initial set up OverWatch will look for all OverWatch systems on the network:
2. *Select* your desired feed and it will start streaming.

OverWatch™ Standalone User Interface

OverWatch™ Motion Detection

The Camera detects motion and begins to record if that feature has been turned on. Enabling this feature is discussed in the Preferences/Settings Section of the manual.

The OverWatch™ System will draw a box around the area where motion is detected. The box will follow the “object” until it is out of view from the camera or until the system no longer detects motion.

OverWatch™ Camera Status Matrix

No Motion Detected	Motion Detected not recording	Motion Detected Auto recording
ow1  Not Recording  No Motion	ow1  Not Recording  Motion Detected	ow1  Recording  Motion Detected

No Motion Detected -- Motion has not been detected by the OverWatch™ system

Motion Detected -- Motion has been detected by the OverWatch™ System

Recording -- The OverWatch™ system is recording camera footage while there is motion detected

3. **Tap** Confirm to continue.

OverWatch™ Standalone: Files

OverWatch™ Standalone: Files Overview

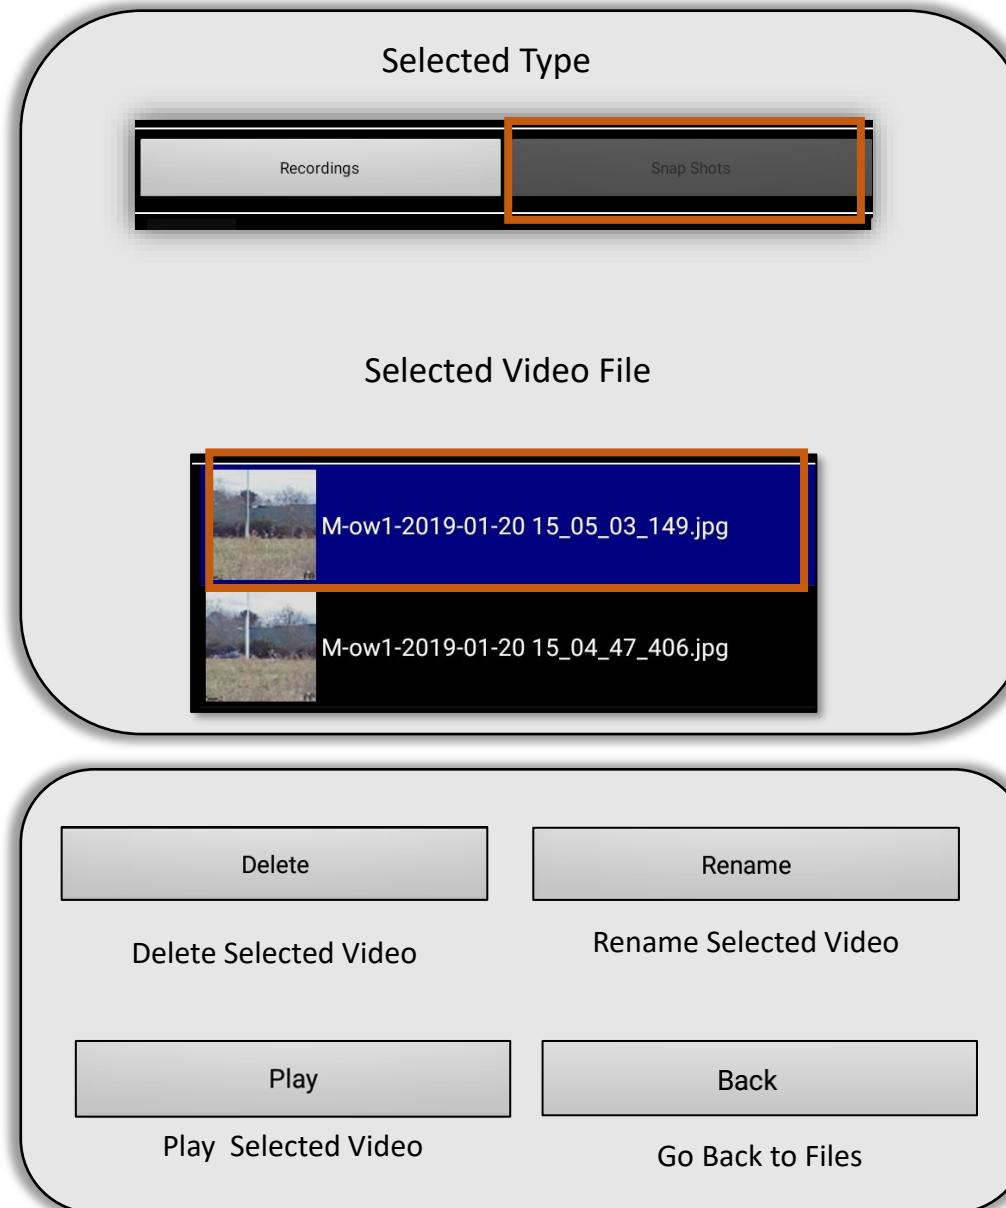

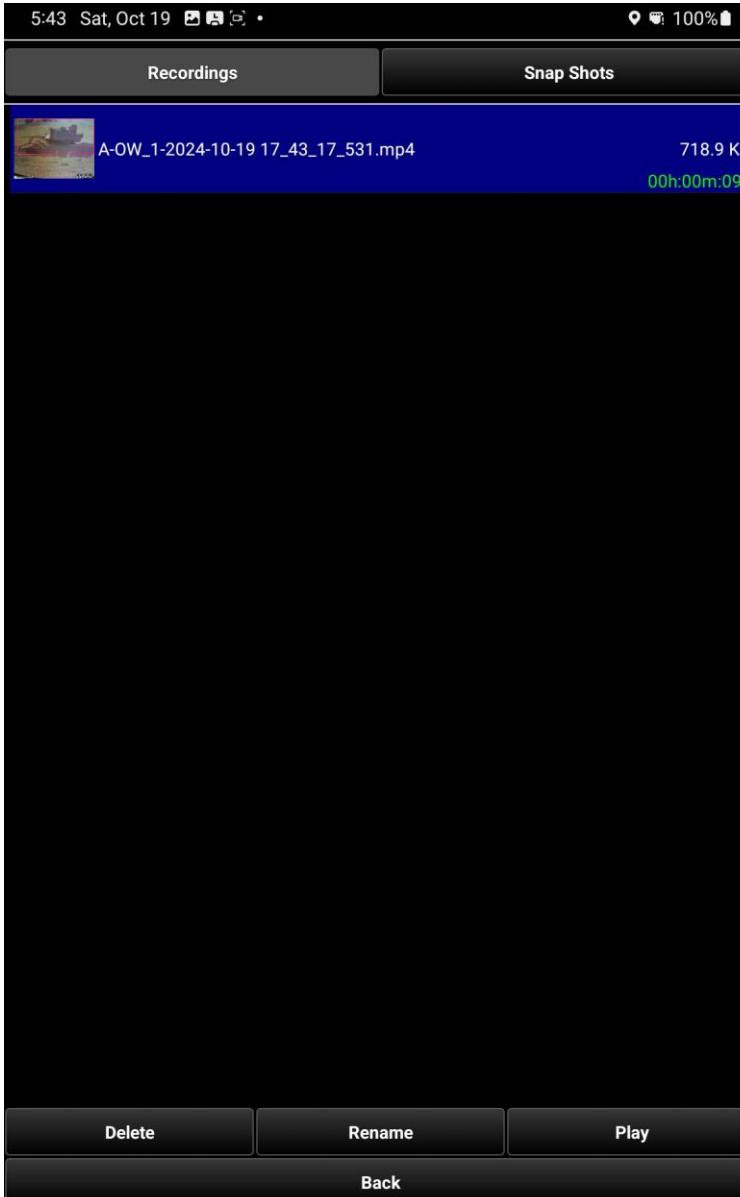

The OverWatch Files allows users to view snapshots and recordings. These files are either manually created using the snapshot or record buttons from the main interface or by toggling the OverWatch™ settings to automatically record when motion is detected. Files tagged with A_ were automatically captured and files with M_ were manually captured.

Recordings	Snap Shots

OverWatch™ Standalone: Settings

OverWatch™ Standalone: Settings Overview

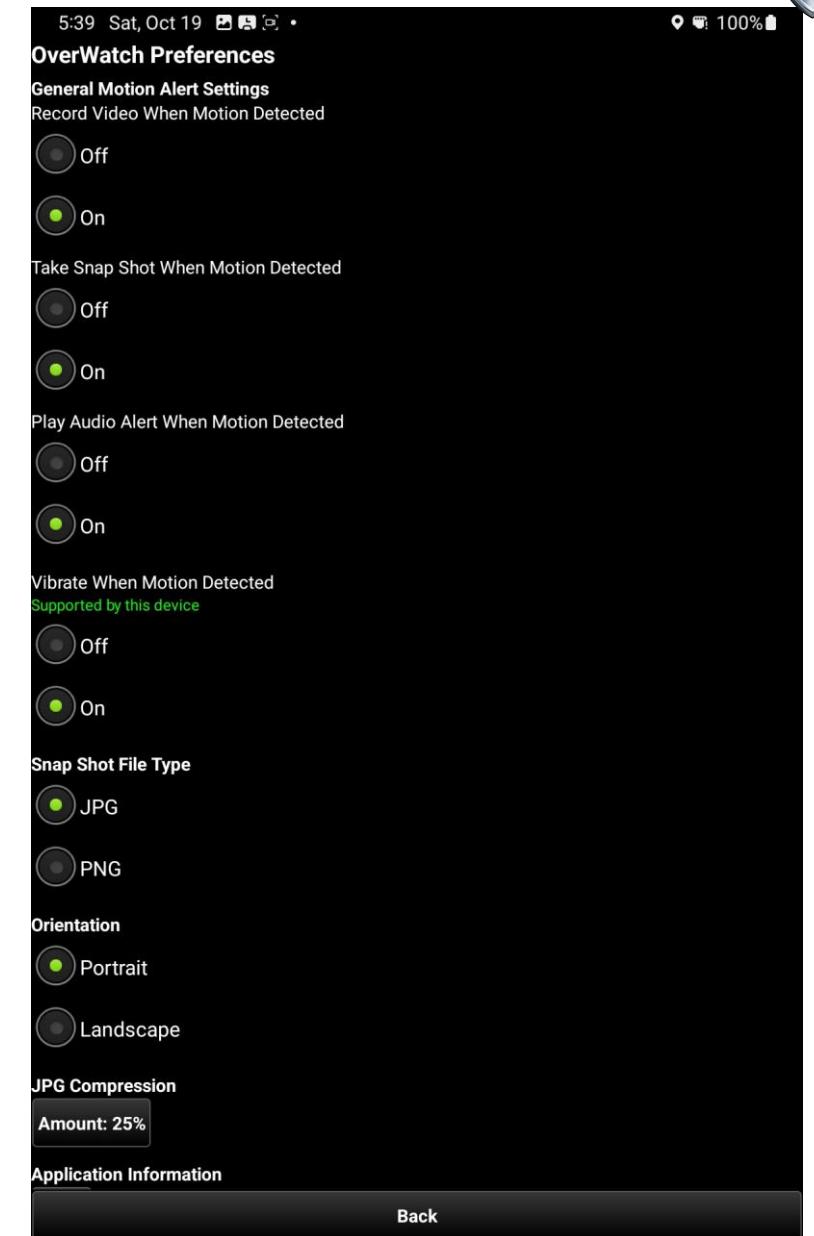

Tap Settings on the Main Interface to open the OverWatch™ Preferences Window. Configuring the preferences options in this section assumes the user has done this step.

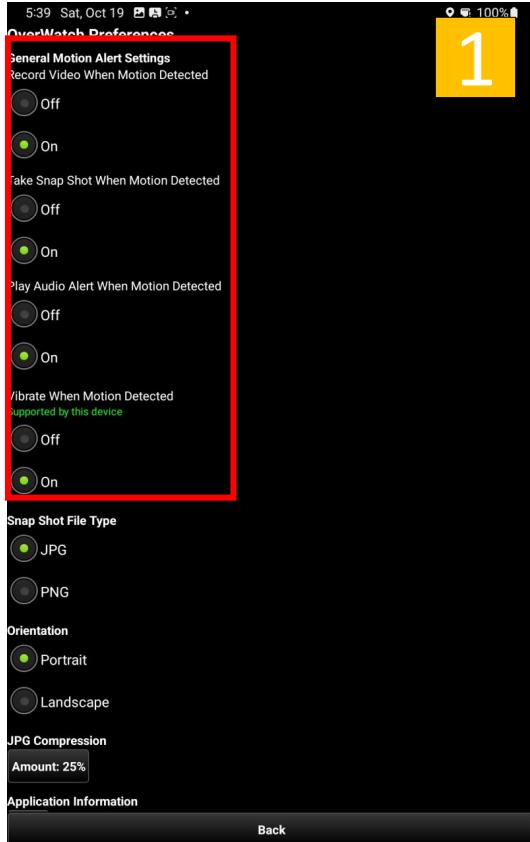

The OverWatch™ Settings (aka Preferences) allows the user to:

- Modify Camera Names
- Change IP Addresses and Ports
- Toggle Motion Alert Settings
- Modify Snapshot Settings
- Adjust the Orientation of the OverWatch™ App
- Configure the Settings on the OverWatch™ board (**ADVANCED**)*

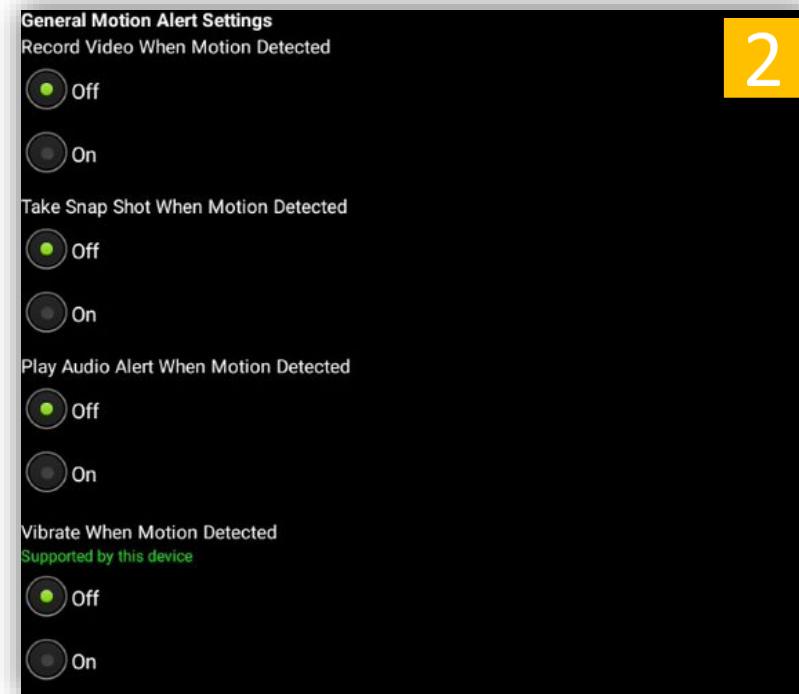

*This should be done with extreme caution!

OverWatch™ Standalone: Settings – Motion Alert Settings

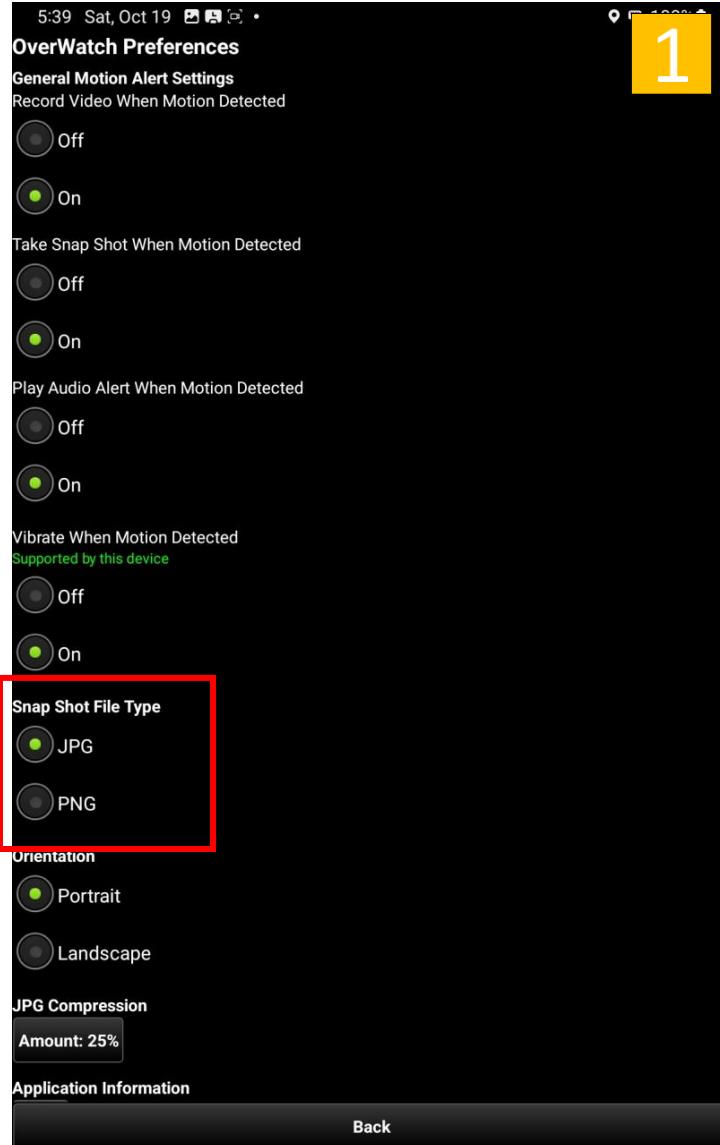

1. Locate the General Motion Alert Settings.
2. ***Toggle Camera Motion Alert Settings*** from Off to On as desired. ***Tap Back*** at the bottom of the “OverWatch Preferences” screen to return to the OverWatch Main” screen.

The OverWatch™ App provides visual, haptic, and audio alerts to users when the system detects motion.

OverWatch™ Standalone: Settings – Snapshot File Type

Snapshot File Type

JPG

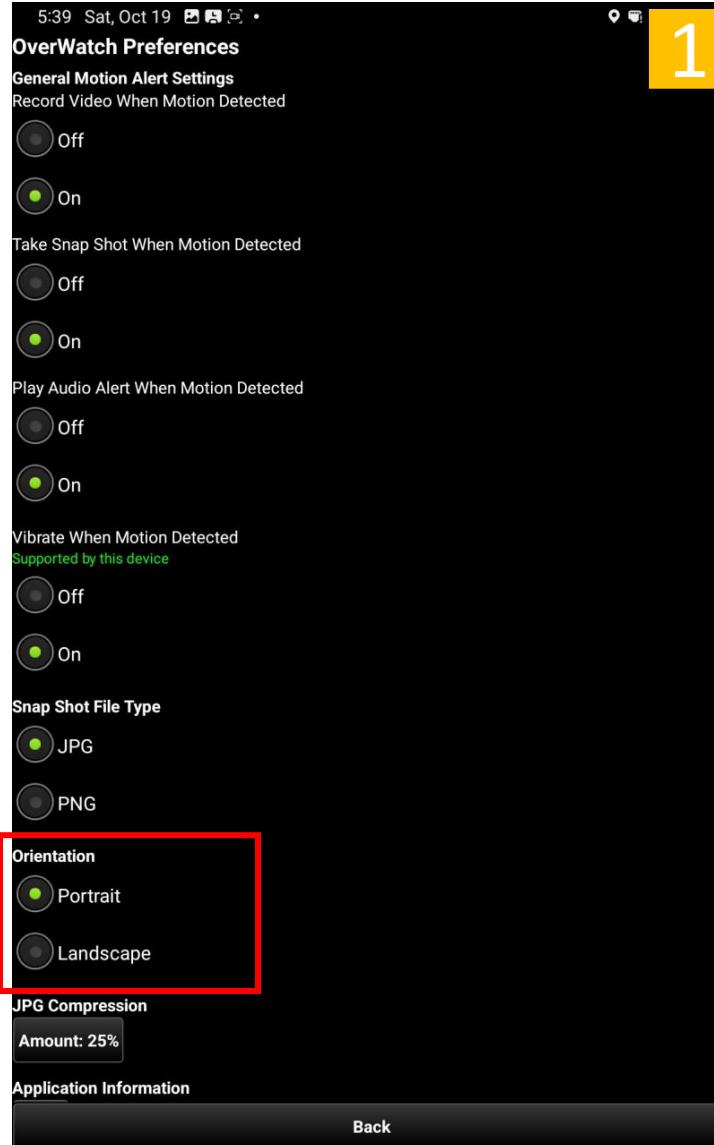

PNG

2

1. Locate Snapshot File Type.
2. **Tap** JPG or PNG to change the snapshot file type. The default value is JPG. **Tap Back** at the bottom of the “OverWatch Preferences” screen to return to the “OverWatch Main” screen.

OverWatch™ Standalone: Settings – Orientation

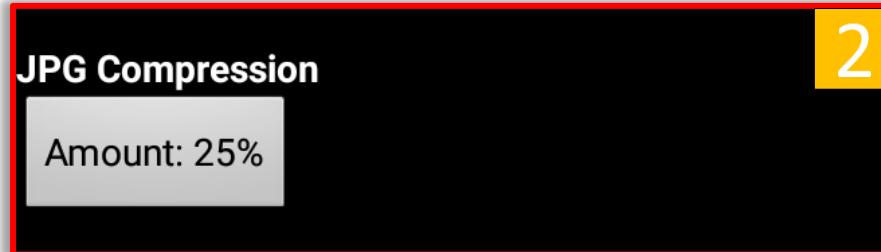

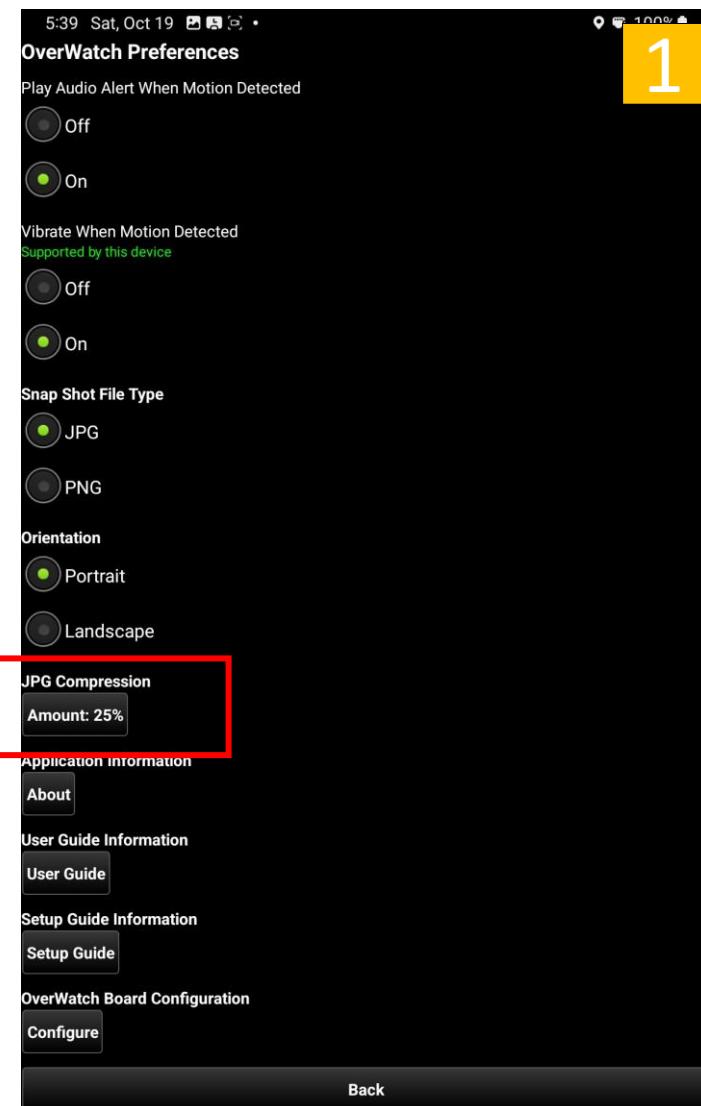

1

2

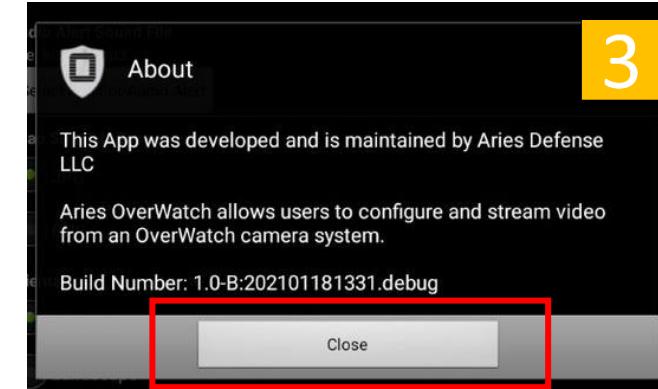

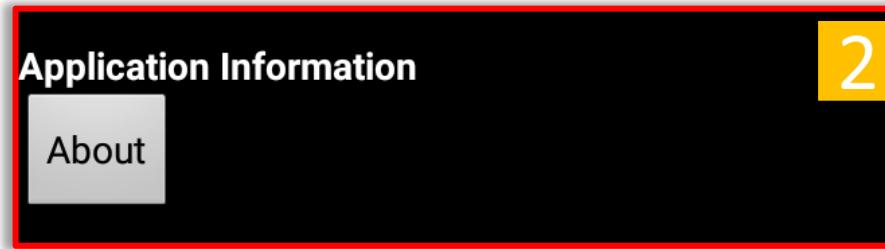

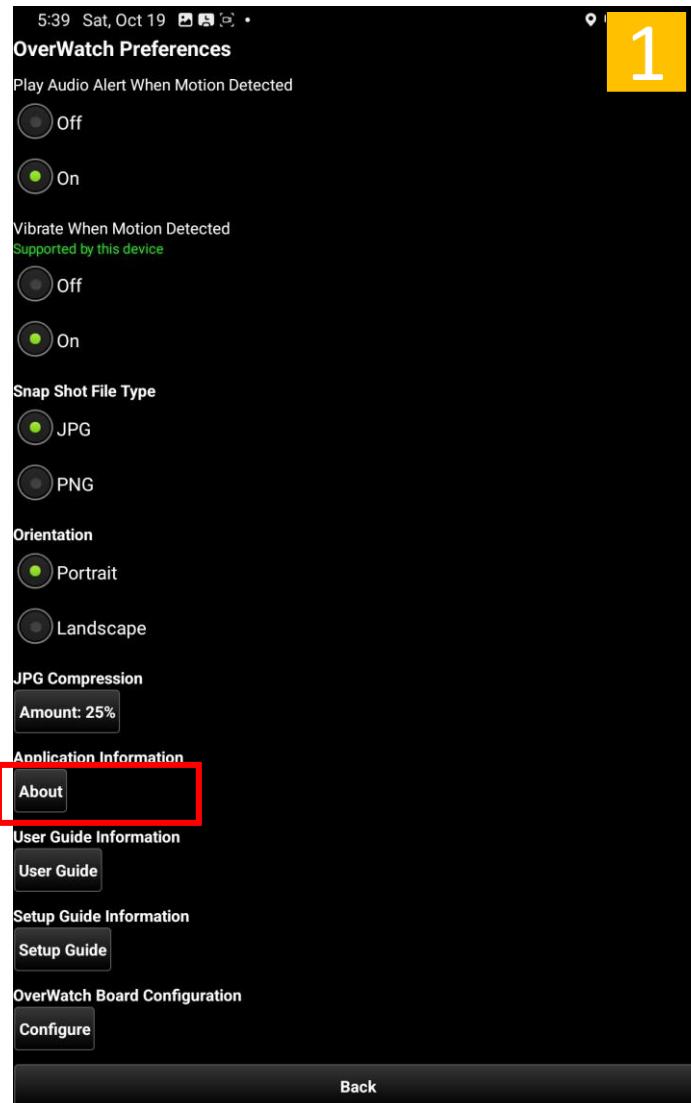

1. Locate Orientation.
2. **Tap** Portrait or Landscape to change the orientation of the app. The default value is Portrait. **Tap** Back at the bottom of the “OverWatch Preferences” screen to return to the “OverWatch Main” screen. You will have to restart the app to apply the orientation change.

OverWatch™ Standalone: Settings – JPG Compression

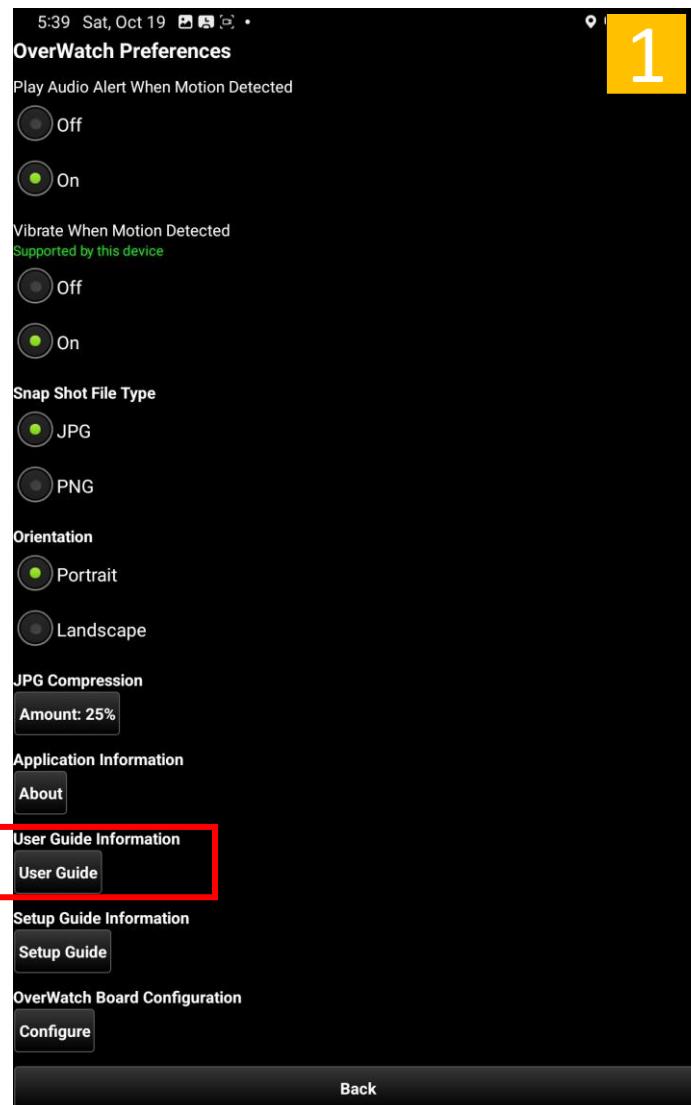

1. Locate JPG Compression
2. *Tap Amount* to change the compression amount of the JPG snapshots.
3. Enter the new compression value. The default value is 25%.
Tap Confirm to accept the new value or *Cancel* to disregard.
Tap Back at the bottom of the “OverWatch Preferences” screen to return to the “OverWatch Main” screen.

OverWatch™ Standalone: Settings – Application Information

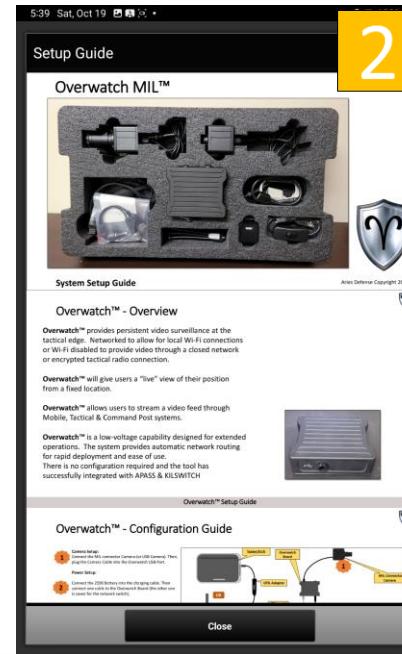

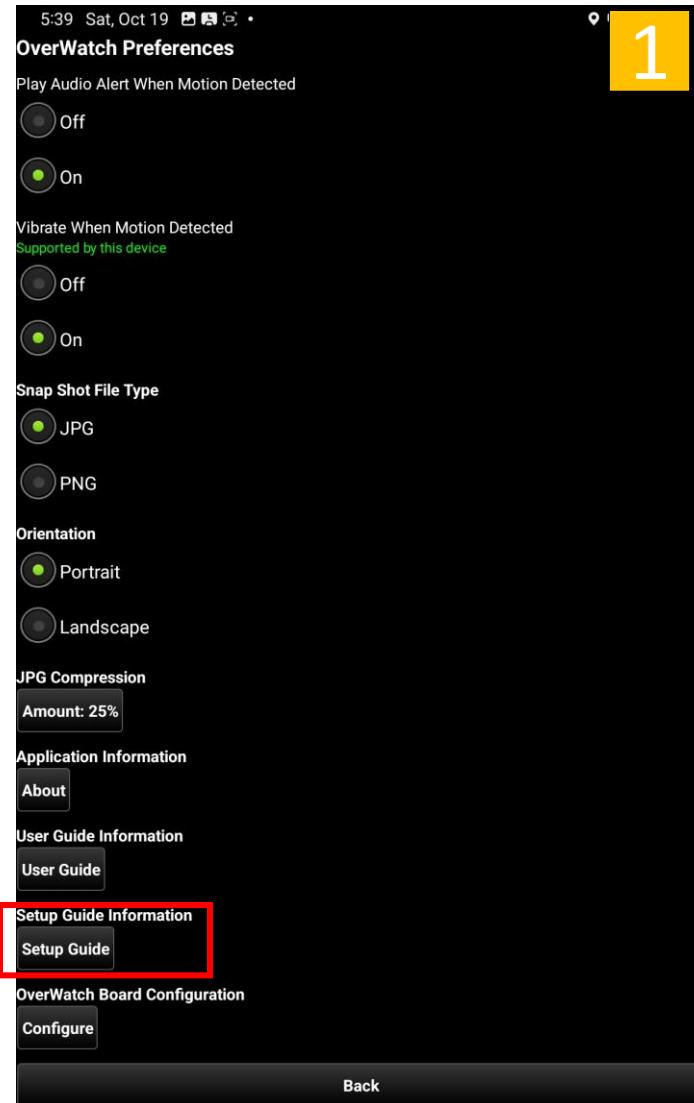

1. Locate Application Information.
2. *Tap About* to view the Application Information.
3. *Tap Close* to exit the About window. *Tap Back* on the bottom of the “OverWatch Preferences” screen to return to the “OverWatch Main” screen.

OverWatch™ Standalone: Settings – User Guide

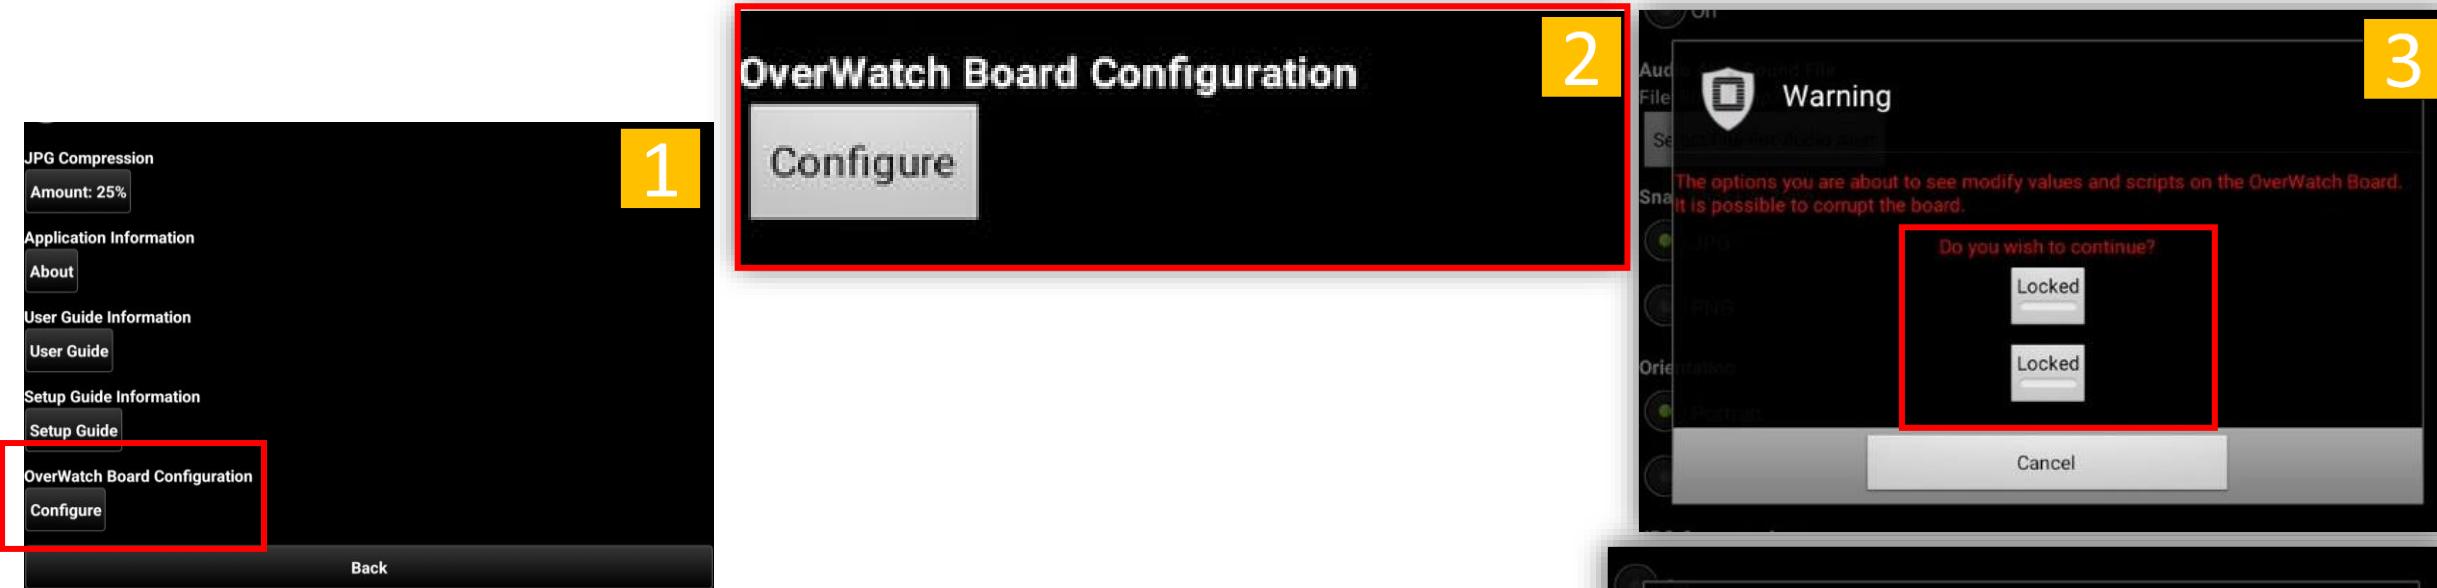

1. **Tap Guide** to view the User Guide.
2. **Tap Close** to exit the User Guide window. **Tap Back** on the bottom of the “OverWatch Preferences” screen to return to the “OverWatch Main” screen.

OverWatch™ Standalone: Settings – Setup Guide

1. **Tap Guide** to view the Setup Guide.
2. **Tap Close** to exit the Setup Guide window. **Tap Back** on the bottom of the “OverWatch Preferences” screen to return to the “OverWatch Main” screen.

OverWatch™ Standalone: Settings – Board Configuration

1. Locate OverWatch Board Configuration.
2. ***Tap Configure***
3. Read the warning message then ***Tap*** both Locked Buttons to set them to Confirm then tap Continue enter the Configuration Menu.
WARNING Entering in invalid settings could potentially render the system inoperable.

OverWatch™ Board Configuration

OverWatch™ Board Configuration - Overview

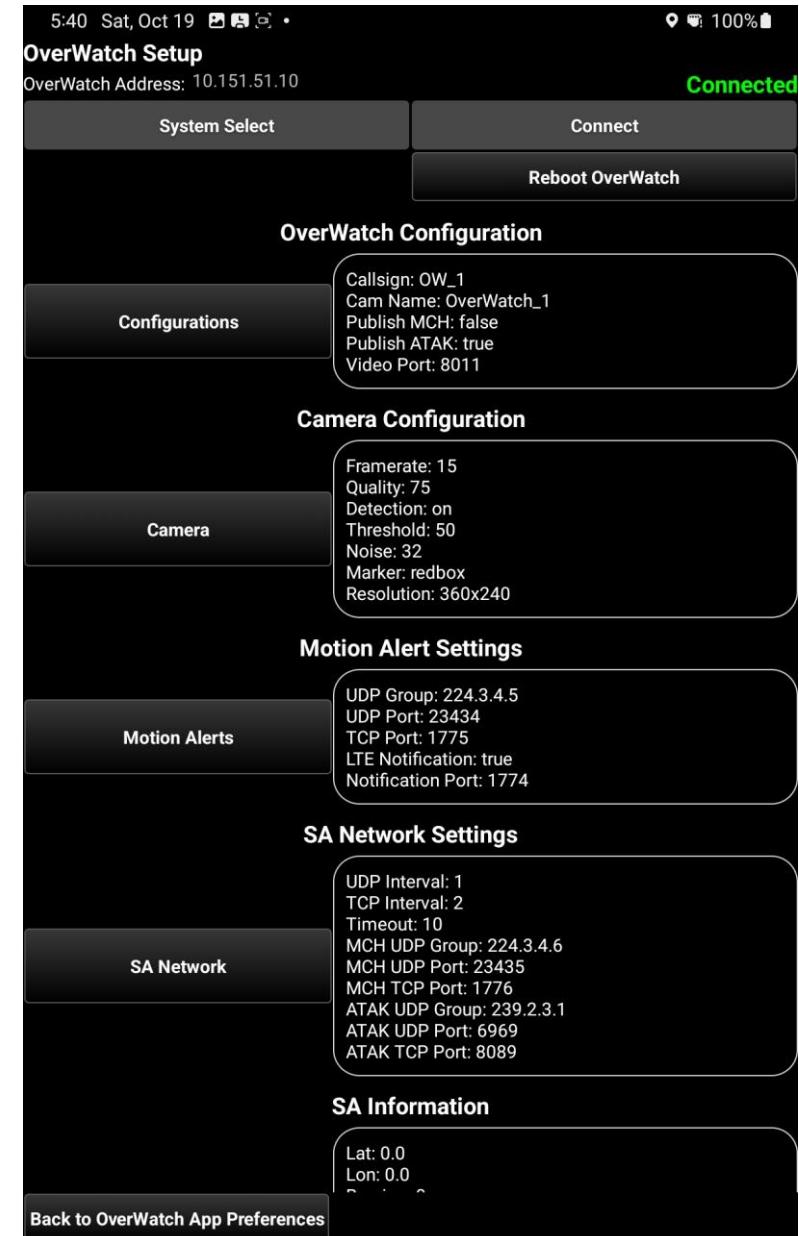

Please see “OverWatch™ Settings – Board Configuration” and follow the steps to access the Board Configuration Menu. Configuring the preferences options in this section assumes the user has done this step.

The OverWatch™ Board Configuration allows the user to:

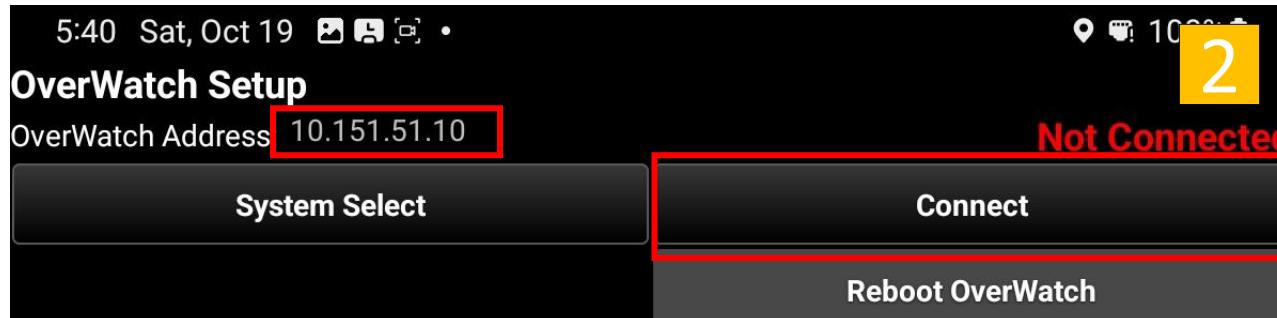

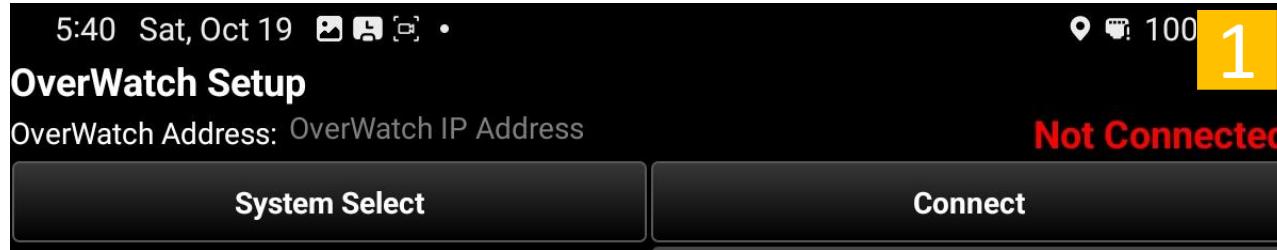

- Set Camera Label
- Adjust Camera Framerate
- Toggle Motion Detection, Threshold, and Noise Level
- Change Motion Marker
- Modify IP Address, Netmask, Gateway and Ports

****IMPORTANT**** After the configurations have been altered the board must be rebooted. This can be done by taping the *Reboot OverWatch™ Button*. Close the OverWatch™ App and relaunch once the EUD receives a DHCP IP Address from the OverWatch™ Board.

Proceed with caution

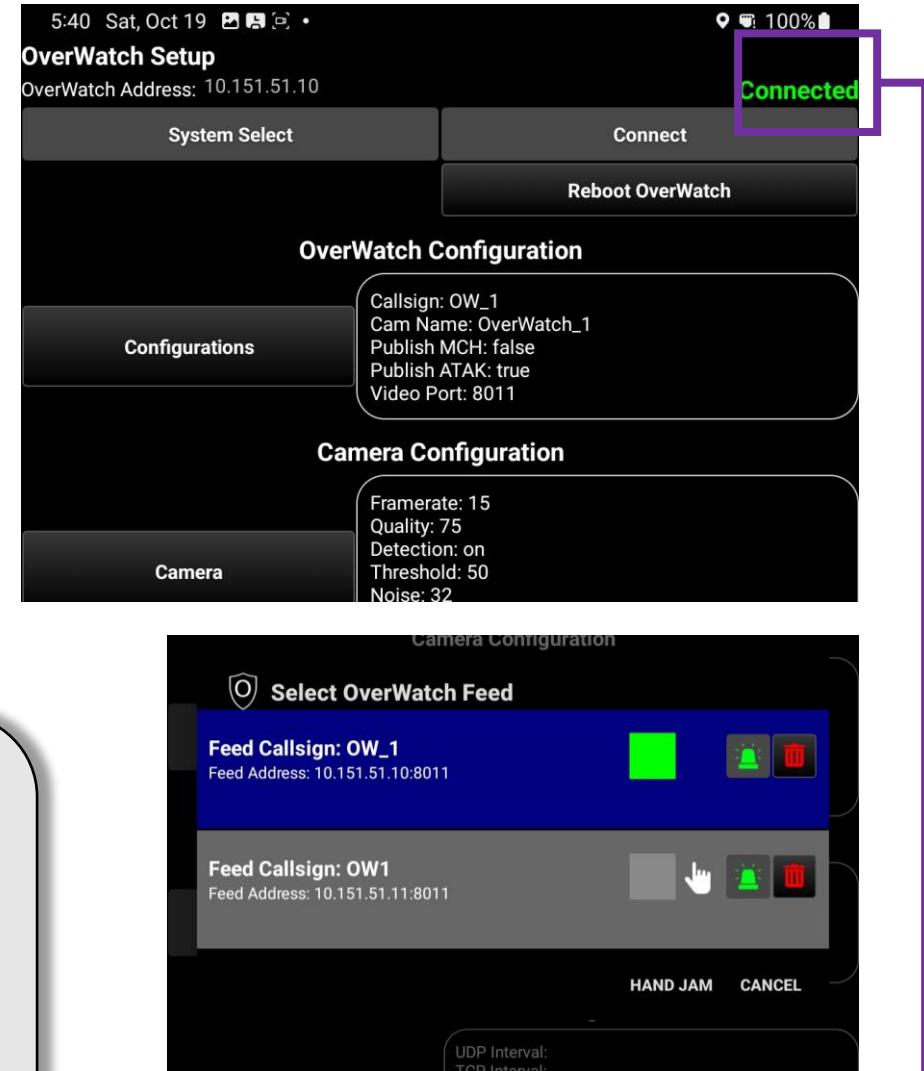

OverWatch™ Board Configuration – Connect to Board

1. Select the feed of the OverWatch™ to configure. The Default IP Address is 10.151.51.10.
2. **Tap Connect.**

Connection Status:

Not Connected – The OverWatch™ App is not logged into the Board
Connecting... – The OverWatch™ App is trying to establish a logon session
Connected – The OverWatch™ App is currently logged into the board.
